- Accessible Globally 24/7 through the Internet
- Configurable, Flexible and Reliable Application
- Data backed up daily on Private Servers
- Free Updates and System Improvements
- Flexible Payment Arrangements
- Software Plus Service with Online Support and Training
- Fully tax deductible

### The Operational Savings

#### No upfront spending on the following:

- Software licences for applications and databases
- Server hardware and operating systems
- Upgrades to network infrastructure
- Long deployments and expensive custom code
- Upgrades to physical infrastructure (save power and rack space)
- Admin and user training, ongoing support

### The Application

- Dashboard that displays notifications of actions, activities and performance.
- Setup process supports integration of existing employees within your business.
- Ability to access rights and permissions to users within your business ensuring sensitive information is kept as such.
- Point of time data capturing mechanisms from various modules
- Ability to assign and track tasks and responsibilities throughout the system
- Integrated review and approval process for documentation prior to distribution and use. No more paper based sign-off!
- Reporting and recording mechanism to managing incidents, injuries and risk
- Online auditing tools which can be assigned to various users and results tracked through Dashboard
- Risk management matrix configurable to company risk tolerance levels
- Reduce cost of training through our online training module
- Accountability within management team to manage business risk performance
