Sii can make a profoundly positive difference to business operations.

Sii has established a reputation for providing transformational solutions

Combining contemporary management knowledge and expertise with demonstrable understanding, ability to apply concepts of management, process architecture, resource planning, systems thinking, strategic management, workflow and process re-engineering

We are **Business Capability Builders** providing functional, relevant, practical and usable systems

Founded to assist organisations improve internal processes and manage resources effectively.

Helping fulfil the key role that your resource planning, people and systems play in achieving organisational success.

Providing you specialist knowledge and consulting expertise

Knowing how operations need to function is imperative in establishing relevant and effective processes and systems.

Our process is **simple and effective**. **Observe** the current process, **Identify** the source of the problem, implement the **improvements**. **We guarantee our work**, and provide ongoing monitoring and support.

Sii's Principal is Craig Clancy.

Employing a consultative approach, is a successful manager in his own right having had significant experience in Industry. Spanning over 30 years in Construction, Civil Construction, Resources, Transport and Logistics.
